## Funds Performance Report FEBRUARY 2016

IGI Life Insurance Limited

# FUND MANAGER REPORT

For the month of February 2016

## Macro Review and Outlook:

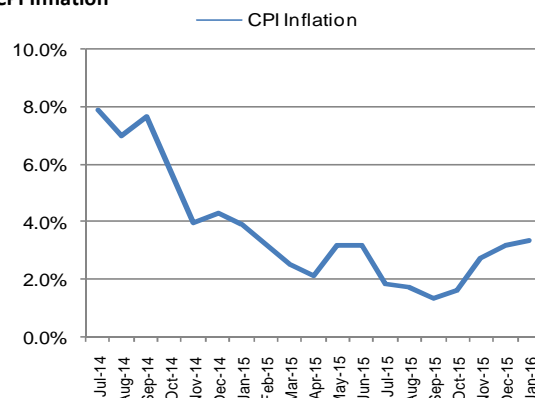

Pakistan observed substantial economic progress in CY15 over CY14, with improvement seen across majority of economic indicators. Much of this improvement is down to low commodity prices, which helped in curtailing import bill (oil imports), but it also impacted exports.

Owing to sharp decline in oil prices and subdued food prices, headline inflation as measured by CPI printed a +4.02%YoY (-0.25%MoM), bringing 8MFY16 average inflation to +2.46%YoY compared to +5.47%YoY same period last year.

For the period 7MFY16 country's import bill further declined to USD 23bn (down by 7%YoY) owing to continued decline in international oil prices, which touched a low of USD 30.4/bbl (Arab Light). However, due to low commodity prices, country's exports also fell by 11%YoY to USD 12.5bn as international cotton prices remain depressed during the period. Nevertheless, country's trade terms improved slightly by USD ~100mn to USD 10.8bn. Remittances inched up by 6.0%YoY to USD 11.2bn. Incorporating the above, Pakistan current account deficit stood at 2.0bn (or 1.2% of the GDP) compared to USD 2.6 (or 1.7% of the GDP). Foreign Exchange reserves for the month of Feb-16, stood at USD 20.4mn. leaving just over 4.7 months of import cover. PKR gained 40 paisas during the month to end at 103.9 against the USD.

**Outlook:** With inflation staying rather low in FY16 and external account position remaining under 2% of the GDP, there is high probability of further rate cut by a minimum of 50bps during the year to 5.5%. Key to track would be volatility in international oil prices and rebound in base commodity prices and global equity market performance.

## Equity Market Review and Outlook:

The Equity market as measured by KSE 100 for the month of Feb-16, edged up by 0.2%MoM, compared to last month's negative return of 5%, to close the index at 31,370 points. During the month, average daily volume increased by 5.7% MoM reaching 130mn, whereas average daily value traded amounted to USD 58.8mn. Sector-wise, Automobile, Food, Cements and Oil & Gas contributed negatively to index, while, Sugar, Banks, contributed positively to index. Volumes wise, Banks, Cements, OMCs and Power attracted the major volumes. Company-wise, TRG, JSCL, FCCL SNGP and KEL were volume leaders. Foreign investors remained net seller, with Feb-16 net sell amounting to USD 39.5mn. Most of the foreign portfolio sectors witnessed heavy outflow with Banks witnessing the highest of USD 20.5mn followed by Oil & Gas (USD 13.5m), Others (USD 17.9m), Fertilizer (USD 5.4m), Power (USD 4.0m), Textile (USD 3.5m), OMCs (USD 2.6m) and Food (USD 0.6m) respectively. Cement sector witnessed highest net buying amounting to USD 18.3mn as well as Technology of USD 0.2mn. Key news highlights that impacted the market were, Reduction in Oil prices and Petroleum products by an average ~10%, Pakistan signed a 15-year LNG supply deal with Qatar, delay in investment of PIA / Pakistan Steel Mills, and NEPRA finally set an upfront tariff for HUBC coal power project.

**Outlook:** With oil prices staying volatile as near term resolution to OPEC and non-OPEC seems unclear, we see Oil & Gas sector performance to stay tricky. Full year result for Banks may track some attraction owing to better pay-out. Similarly, pick-up in cements sales post winter and availability of LNG in 2HFY16, may gain some interest in manufacturing sectors such as Fertilisers, Textile etc. Currently Pakistan is trading at PER of 8.3x and offering a dividend yield of 6.6% compared to regional average of 13.8x and 3.0%, respectively.

In the PIB auction conducted during the month SBP raised a total of PKR 152bn against target of PKR 50bn.

**Outlook:** Owing to subdued food prices, inflation as measured by CPI printed a +4.0%YoY, although a decline of -0.3%MoM, bringing 8MFY16 average inflation to +2.46%YoY compared to +5.47%YoY same period last year.
