Macro Review and Outlook:

Current Account registered a deficit of USD 1,932Mn during December 2021 (6MFY22: -9,092) versus a deficit of USD 629Mn during same month previous year (6MFY21: 1,247). On a month-on-month basis, Current Account deteriorated by ~2.0%. Recent measures by the Government such as increase in discount rates, currency devaluation, high Cash Reserve Requirements (CRR), cash margin requirements on imports, restriction on import on non-essential items are expected to contain the import bill in coming months.

Yearly Inflation numbers for the month of January-2022 arrived at 12.97% majorly due to low base effect and monthly inflation of 0.39%. Food and non-alcoholic beverages, which has the highest contribution in CPI basket, decreased by 0.45% monthly. However, increase in Furnishing, Healthcare, Restaurants and Transport index countered this decrease. Elevated commodity and petroleum prices are expected to keep inflation in double digits in coming months. SBP expects inflation to average between 9% to 11% during fiscal year 2022.

Gross Foreign Reserves at January-end decreased by USD 1.8Bn and closed at USD 22.08Bn due to external debt servicing and other official payments. Pakistan received USD 1.053Bn from IMF after successful completion of 6th review of IMF program. Remaining USD 3Bn under the EFF will be received in 3 tranches after reviews in March, June, and September 2022. Successful resumption of IMF program is expected to open doors to inflows from Asian Development Bank, World Bank, Islamic Development Bank and capital markets.

Pak Rupee depreciated to an all-time low against USD to 178.235 levels during December 2021 due to higher imports and fear of depleting foreign reserves. However, the rupee recovered against dollar and closed at Rs. 176.7172 at month-end. Latest released numbers show that PKR is currently close to its equilibrium value, as measured by Real Effective Exchange rate (REER).

Large scale manufacturing (LSM) grew slightly by 1.9% monthly while 4MFY22 increased by 3.26% compared to 4MFY21. The production in July-November 2021-22 as compared to July-November 2020-21 has increased in Textile, Food, Beverages & Tobacco, Coke & Petroleum Products, Pharmaceuticals, Chemicals, Automobiles, Iron & Steel products, and Paper & Paperboard while it decreased in Non-Metallic Mineral Products, Fertilizers, Electronics & Rubber Products. The growth was led by Automobile (4MFY22: 34.49%) and Iron and steel products (4MFY22: 25.27%)

Equity Market Review and Outlook:

Year 2022 started on a positive note and KSE-100 posted a return of 1.75% during January (verses a return of -1.06% during December) and closed at 45,375 levels (+779 points). Positive sentiments in the market was fueled by status quo in the monetary policy settings, expected resumption of IMF program after passing of SBP Bill in Senate and Supplementary Finance Bill in National Assembly.

Total monthly turnover decreased by 12.5% from 2.4Bn to 2.1Bn shares for KSE-100 index. Foreigners remained net buyers during the month with USD 17.57Mn net inflow. Locally, Mutual Funds and Brokers were the major sellers with combined selling of USD 26.36Bn during the month.

Power Gen, Banks and Food sectors were the top performing sectors during the month with 11.0%, 4.4% and 3.3% return respectively. While sectors which posted negative returns were Technology (-7.1%), Refinery (-4.1%) and Insurance (-2.0%). (Source: BR Indices)

Current macro-economic concerns like rising imports, policy rate, inflationary pressures due to increasing petroleum and commodity prices and pressure on currency will dictate the market direction in near term.

FUNDS MANAGEMENT REPORT For the month of January 2022

Money Market Review and Outlook:

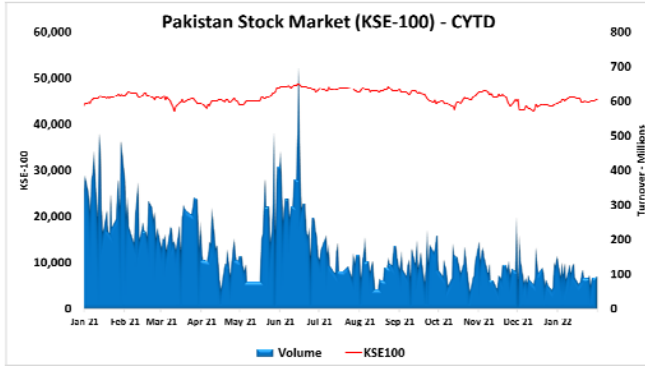

In line with expectations and forward guidance provided by SBP, policy rate remained unchanged at 9.75% in December's monetary policy. SBP has indicated that end goal of mildly positive real interest rates on a forward-looking basis was now close to being achieved.

Yields for 3M, 6M and 12M instruments decreased by 16bp, 71bp and 61bp respectively during the month and closed at 10.19%, 10.59% and 10.77%. Yields for longer maturity instruments also decreased by 60bp and 64bp for 3-Year and 5-Year instruments respectively and closed at 10.77%.

Spread between policy rate and 3M T-Bills is currently ~44Bp while the spread with 6M T-Bills is ~84bp indicating that major portion of increase in policy rates has been already taken place. MPC has also indicated only modest change in monetary policy settings going forward if needed. Yield curve is also almost flat between 6M (~10.59%) and 5Yr (~10.86%) instruments further strengthening the view that Pakistan is near its end of monetary tightening phase. However, trajectory of global prices of commodities and petroleum products, trade deficit, exchange rate and inflation numbers in upcoming months will bring more clarity to the direction of interest rates in coming months.
