Macro Review and Outlook:

Current Account registered a record high deficit of USD 2,556Mn during January 2021 (6MFY22: -11,579) verses a deficit of USD 219Mn during same month previous year (6MFY21: 1,028). On a month-on-month basis, Current Account deteriorated by ~37.0%. Prolonged global political uncertainty due to Russia-Ukraine conflict can keep the international commodity prices elevated, which could put further pressure on the Pakistan's import bill in coming months.

Yearly Inflation numbers for the month of February-2022 decreased from 12.97% in Jan-21 to 12.24% majorly due to low base effect. MoM inflation was 1.15%. Food and non-alcoholic beverages, which has the highest contribution in CPI basket, increased by 14.03% monthly reflecting higher prices for tomatoes, fresh vegetables, chicken, and vegetable ghee. However, decrease in Housing, Water and Electricity index countered this increase. Elevated commodity and petroleum prices are expected to keep inflation in double digits in coming months. SBP expects inflation to average between 9% to 11% during fiscal year 2022 before declining toward the medium-term target range of 5% to 7% in FY23 as global commodity prices normalize.

Latest released numbers show that PKR is currently close to its equilibrium value, as measured by Real Effective Exchange rate (REER). However, elevated commodity prices are expected to put pressure on CAD and exchange rate in coming periods.

Gross Foreign Reserves at February-end decreased by USD 0.2Bn and closed at USD 22.6Bn. Pakistan received USD 1.053Bn from IMF after successful completion of 6th review of IMF program during January. Remaining USD 3Bn under the EFF will be received in 3 tranches after reviews in March, June, and September 2022. IMF has shown concern on recent relief package and amnesty scheme announced by prime minister. 7th IMF review (due in March) might hang in balance till the prices of petroleum products are re-adjusted.

With election year approaching, local political environment is also heating up. Opposition has recently submitted a notice for a no-confidence resolution to remove the prime minister.

Equity Market Review and Outlook:

February 2022 started on a positive note with resumption of IMF program and USD 1Bn Euro Bond issue. However, investor's sentiment soon turned bearish with news relating to Russian-Ukraine conflict and soaring commodity prices as a result. Rising local political uncertainty also dampened the investor's sentiments further. KSE-100 posted a return of -2.0% during February (verses a return of 1.75% during December) and closed at 44,431 levels (-914 points MoM).

Total monthly turnover decreased by 7.4% from 2.1Bn to 1.9Bn shares for KSE-100 index. Foreigners and local Mutual Funds remained net sellers during the month with USD 15.03Mn and USD 19.8BN net outflow respectively.

Automobile Assemblers, Textile and Fertilizers were the top performing sectors which posted returns of 7.04%, 2.77% and 2.19% respectively. While sectors which posted negative returns were Technology (-12.61%), Engineering (-11.36%) and Cement (-4.92%).” (Source: BR Indices)

Current macro-economic concerns like rising CAD, expected hike in policy rate, inflationary pressures due to increasing petroleum and commodity prices along with local and global (Russia-Ukraine conflict) political uncertainty will dictate the market direction in near term.

FUNDS MANAGEMENT REPORT For the month of February 2022

Money Market Review and Outlook:

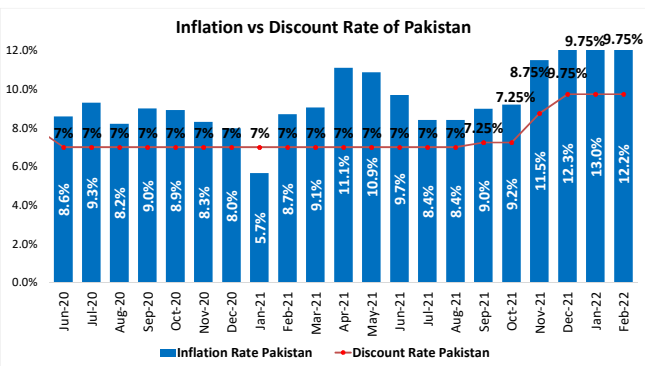

In line with expectations and forward guidance provided by SBP, policy rate remained unchanged at 9.75% in March's monetary policy despite record high CAD levels reported in January. SBP has indicated that higher than expected adverse movement in CAD and inflation levels due to on-going Russia-Ukraine conflict and high commodity prices could necessitate changes in the policy rate and MPC is prepared to meet earlier than the next scheduled MPC meeting in late April, if necessary, to take any needed timely and calibrated action to safeguard external and price stability.

Despite no change in monetary policy, yields for 3M, 6M and 12M instruments have increased by 78bp, 53bp and 59bp respectively since the end of January. Yields for longer maturity instruments also increased by 19bp and 17bp for 3-Year and 5-Year instruments respectively.

Trajectory of global prices of commodities and petroleum products, trade deficit and inflation numbers in upcoming months will bring more clarity to the direction of interest rates.
