Macro Review and Outlook:

Current Account deficit stood at USD 575Mn during February 2021 (8MFY22: - USD 12,1Bn) versus a deficit of USD 54Mn during same month previous year (8MFY21: USD 0.99Bn). Prolonged global political uncertainty due to Russia-Ukraine conflict can keep the international commodity prices elevated, which could put further pressure on the Pakistan's import bill in coming months.

Yearly Inflation numbers for the month of March-2022 increased from 12.24% in February-21 to 12.27% in March. MoM inflation was 0.79%. Food and non-alcoholic beverages, which has the highest contribution in CPI basket of 34.6%, increased by 2.3% monthly. However, decrease in Housing, Water and Electricity index by 2.2% countered this increase. Elevated commodity and petroleum prices are expected to keep inflation in double digits in coming months.

Latest released numbers show that PKR is currently close to its equilibrium value, as measured by Real Effective Exchange rate (REER). However, elevated commodity prices along with debt serving are expected to keep pressure on CAD and exchange rate in coming periods. Gross Foreign Reserves at February-end decreased by USD 5.16Bn and closed at USD 17.5Bn. According to SBP, decline in reserves was mainly due to debt repayments and government payments pertaining to settlement of an arbitration award relating to mining project.

After showing concerns on recent relief package and amnesty scheme announced by the Govt. and prevailing political uncertainty, 7th IMF review was put on pause. IMF's resident representative has indicated that the Fund would engage once the new government is formed.

Former Prime Minister Imran Khan lost the no confidence vote in the National Assembly over the weekend and PML-N's Shehbaz Shareef was elected as 23rd Prime Minister for Pakistan. All eyes are now on new interim economic team and the policies it adopts to counter economic challenges. Ousted Prime Minister has called for country wide protests.

Equity Market Review and Outlook:

KSE-100 posted a return of 1.05% during March (verses a return of 1.1% during February) and closed at 44,929 levels (+467 points MoM)..

Total monthly turnover decreased by 7.4% from 1.9Bn to 1.8Bn shares for KSE-100 index. Foreigners and local Mutual Funds remained top net sellers during the month with USD 24.57Mn and USD 9.35Bn net outflow respectively.

Top performing sectors during the month were Leather (10.2%MoM), REITs (9.6%MoM), FMCGs (6.1%MoM) and Insurance (6.0%MoM) while the major laggards were OMCs (-6.1%MoM), Refineries (-5.4% MoM) and Paper and board (-4.1%MoM) (Source: BR Indices)

Current macro-economic concerns like rising CAD, inflationary pressures due to high petroleum and commodity prices, suspended IMF program along with global (Russia-Ukraine conflict) political uncertainty will dictate the market direction in near term.

FUNDS MANAGEMENT REPORT For the month of March 2022

Money Market Review and Outlook:

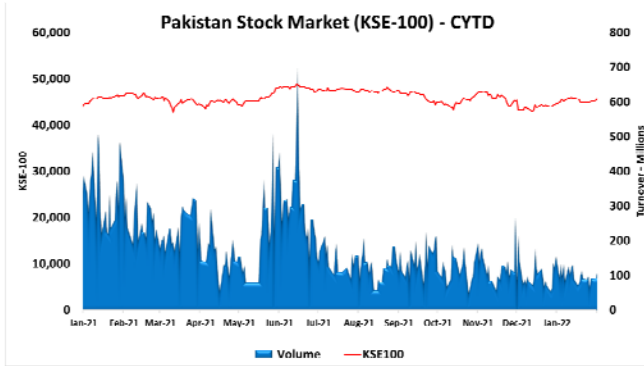

SBP gave an indication in previous Monetary Policy that earlier than expected Monetary Policy Committee (MPC) meeting can be called to bring changes in policy rate, if needed. Policy rate was finally increased from 9.75% to 12.25% (+250Bp) during first week of April in an emergency MPC meeting. According to SBP, a strong and proactive policy response was necessitated by a deterioration on outlook for inflation and increase in risks to external stability since last meeting. After the increase, real interest rates have become almost zero (based on reported inflation numbers of March).

MPC further highlighted that Pakistan's external financing needs in FY22 are fully met from identified sources.

Trajectory of global prices of commodities and petroleum products, resumption of IMF program, trade deficit and inflation numbers in upcoming months will bring more clarity to the direction of interest rates further.
