Unit Pricing Methodology:

The underlying funds are valued at market value on a daily basis. The Underwriting Department clears the applications/builds the policies. On each Unit Valuation Day (UVD) the total net premium figure (reflecting premium receipts, claims, withdrawals, and switching) received is provided to the Accounts Department, who invests the premium in the mutual funds to buy units for the umbrella funds on the same day.

At the end of UVD, the NAV of the umbrella fund is re-calculated given the prices of mutual funds as at that date. The revised NAV is divided by the number of units in the umbrella fund to determine the revised bid price and offer price (105% of bid). The NAV of the additional investment made in the mutual funds is divided by the existing unit price of the umbrella fund (as calculated above) to determine the additional units added in the umbrella fund. The umbrella fund prices thereby calculated (based on the prices of mutual funds as at end of UVD are input on the system the next morning and all transactions are accordingly carried out i.e. allocation of units with respect to purchase, surrender, switching etc. The umbrella fund prices which are put in the system are updated on our website every day for the knowledge of the policyholders and are also communicated to the field force to facilitate their sales.
